## September event

Featuring Terry Curtin

Friday night lecture, 6 September 2019, 8-10pm.

### Jung and Meister Eckhart

Terry will reflect on how a 13th century Dominican theologian/mystic had such a profound impact on Carl Jung who said:

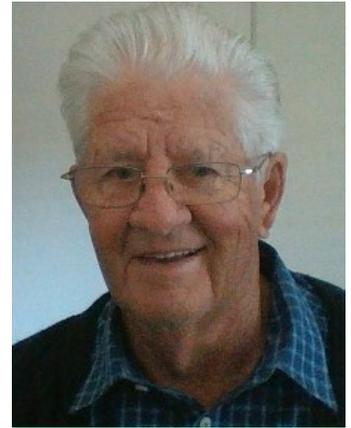

*Only in Meister Eckhart did I find the breath of life.*  
*Memories, Dreams & Reflections, p87*

Meister Eckhart (1260–1326) was a profound thinker and preacher who pushed the boundaries of conventional church teachings by focusing on the individual and their personal experience of God, as opposed to dogma and ritual. This focus is consistent with Jung's belief that one had to personally experience the objective, living psyche/Self.

This presentation will be followed by discussion and work in small groups where each person will be encouraged to share some of their own journey.

### Dialogic Practice and Jung's Concept of the Temenos

Rajiv in this talk will identify the commonalities between Jung's concept of the Temenos — the inner space deep within us where soul-making takes place — and the practice of Open Dialogue (OD). The central clinical element of OD is Dialogic Practice which emphasizes conversations that allow the therapist to be "with" the person as opposed to holding conversations "about" the person.
